■ Apple 30 pin USB Dongle for DVB-T

2. Search and Download Free “**tivizen DVB-T Dongle**” application on iPad

tivizen DVB-T Dongle

tivizen

This application is a tool to view mobile TV on your iPhone or iPod Touch. To use this program, you need a device called "Tivizen", which receives ATSC-M/H mobile digital television signal and transmit it to your iPhone or iPod Touch via Wi-Fi network. With the device connected, you can view the channel list, view TV content, change channels, adjust volume and screen size.

What's new

* iOS 4.0 support is added.
