tivizen

### tivizen DVB-T WiFi application

tivizen

#### tivizen DVB-T WiFi

This application is a tool to view mobile TV on your iPhone or iPod Touch. To use this program, you need a device called "Tivizen", which receives ATSC-MH mobile digital television signal and transmit it to your iPhone or iPod Touch via Wi-Fi network. With the device connected, you can view the channel list, view TV content, change channels, adjust volume and screen size.

#### What's new

\* iOS 4.0 support is added.
